Atmosphere of tomorrow: Morning thundeshower with partly sunny sky

Peculiar observation:

- Yesterday's (June 21, 2019) maximum & minimum temperature was 39.6°C & 30.2°C respectively with maximum & minimum relative humidity as 66% & 35% respectively. Also, rainfall of 16.9mm happened in Gorakhpur district by yesterday.
- June 23, 2019 is expected to be fairly cooler as compared to previous days of June & May, 2019.
- Rainfall is likely to happen in Gorakhpur in the midnight & morning hours of June 23, 2019. Rainfall which happened in the midnight of June 22, 2019 is expected to continue in light & sparsely distributed nature till June 28, 2019.
- Wind gust will be fairly high in Gorakhpur till June 26, 2019 on few instances & is likely to reach the limit of 35-40 km/hr on cloudy or rainy days.

Precautionary measures for citizens of Gorakhpur for next 1 week:

- People living sedentary lifestyle should have minimum intake of 2.5-3 liters of water per day & people exposed to open atmosphere during their duty hours should have minimum intake of 3-3.5 liters of water per day.
- Stay in a safe place and away from the haggard trees or heavy & loose objects lying in an open atmosphere during the period of stormy winds.
- Plan for the outdoor work execution when there is no or minimal presence of cloud in the sky & do take necessary things to stay safe from the stormy winds, heat waves & rainfall.
- Do as much plantation as possible to minimize the increasing level of greenhouse gases in the atmosphere, which are adversely causing a continual increase in the minimum temperature of Gorakhpur because of their ability to absorb infrared radiations.
