Tehsil- Sadar(Gorakhpur) -By AWS	0	0	36	28	NA	NA	NA	NA
District- Gorakhpur	0	0	36	27	78	57	24	ESE

Atmosphere of tomorrow: Hazy sunshine with partly cloudiness in the evening.

Peculiar observation:

- Yesterday's (July 1, 2019) maximum & minimum temperature recorded by Climate Cell of Gorakhpur is 38°C & 28°C respectively respectively along with the wind gust as 14 km/h with dominated wind direction as 'ENE'.
- Rainfall with greater chances & magnitude as 'Rather Heavy' is likely to occur in Gorakhpur on July 4-July 5, 2019 onwards. Also, strong thundershower & heavy rainfall is likely to happen in the ending phase of first week of July, 2019.

Precautionary measures for citizens of Gorakhpur for next 1 week:

- Lightning seeks the highest ground, so if indoor shelter is not available, crouching down in the nearest, lowest & unexposed point is a better bet majorly during cloudy & rainy hours till the storm gets completed.
- Avoid staying near water bodies & strictly avoid being inside the car/vehicle during stormy hours. Tents & pavilions found inside/near parks are not good option to stay.
- Try to stay indoors with closed windows & minimal usage of electric appliances during the rainy & stormy hours and if outdoor then choose an open ground at lower elevation-that too away from water body & tall or metallic structures.
- Stay in a safe place and away from the haggard trees or heavy & loose objects lying in an open atmosphere, beware of high wind gust that is likely to be blown in first week of July, 2019.
- Plan for the outdoor work execution when there is no or minimal presence of cloud in the sky & do take necessary things to stay safe from the stormy winds, heat waves & rainfall.
