Tehsil- Sadar(Gorakhpur) -By AWS	30	60	30	26	NA	NA	NA	NA
District- Gorakhpur	30	60	30	24	99	91	22	ENE

Atmosphere of tomorrow: Partly cloudy sky with chances of Moderate to Rather Heavy rainfall.

Peculiar observation:

- Yesterday's (July 7, 2019) maximum & minimum temperature recorded by Climate Cell of Gorakhpur is 35°C & 27.3°C respectively with maximum & minimum relative humidity as 77 % & 70 % respectively. Also, the speed of wind gust observed was 19 km/h with the dominated wind direction as 'ENE'
- Rainfall with greater chances is expected to happen continuously in the existing manner in an erratic manner till the end of third week of July, 2019. Also, strong thundershower & heavy rainfall is likely to happen on July 8, 2019 till July 10, 2019

Precautionary measures for citizens of Gorakhpur for next 1 week:

- Lightning seeks the highest ground, so if indoor shelter is not available, crouching down in the nearest, lowest & unexposed point is a better bet majorly during cloudy & rainy hours till the storm gets completed.
- Avoid staying near water bodies & strictly avoid being inside the car/vehicle during stormy hours. Tents & pavilions found inside/near parks are not good option to stay.
- Try to stay indoors with closed windows & minimal usage of electric appliances during the rainy & stormy hours and if outdoor then choose an open ground at lower elevation-that too away from water body & tall or metallic structures.
- Stay in a safe place and away from the haggard trees or heavy & loose objects lying in an open atmosphere, beware of high wind gust that is likely to be blown in second week of July, 2019.
- Plan for the outdoor work execution when there is no or minimal presence of cloud in the sky & do take necessary things to stay safe from the stormy winds, heat waves & rainfall. Avoid moving out of the abode for least significant work at least till June 10, 2019 & if moving, then do remember all the precautionary measures instructed above for lightning, rainfall & storm.
