Atmosphere of tomorrow: Cloudy sky with light moderate rainfall in the evening followed by heavy rainfall in the evening & overnight.

Peculiar observation:

- July 9, 2019 has been recorded as the day of maximum rainfall till now in 2019, with the magnitude as 125 mm.
- Yesterday's (July 9, 2019) maximum & minimum temperature recorded by Climate Cell of Gorakhpur is 28°C & 25.3°C respectively with maximum & minimum relative humidity as 90% & 90% respectively. Also, the speed of wind gust observed was 35 km/h with the dominated wind direction as 'ENE'.
- Heavy rainfall which took place on July 8, 2019 is expected to continue in a scattered way till third week of July, 2019.

Precautionary measures for citizens of Gorakhpur for next 1 week:

- Lightning seeks the highest ground, so if indoor shelter is not available, crouching down in the nearest, lowest & unexposed point is a better bet majorly during cloudy & rainy hours till the storm gets completed.
- Avoid staying near water bodies & strictly avoid being inside the car/vehicle during stormy hours. Tents & pavilions found inside/near parks are not good option to stay.
- Try to stay indoors with closed windows & minimal usage of electric appliances during the rainy & stormy hours and if outdoor then choose an open ground at lower elevation-that too away from water body & tall or metallic structures.
- Stay in a safe place and away from the haggard trees or heavy & loose objects lying in an open atmosphere, beware of high wind gust that is likely to be blown in second week of July, 2019.
- Plan for the outdoor work execution when there is no or minimal presence of cloud in the sky & do take necessary things to stay safe from the stormy winds, heat waves & rainfall. Avoid moving out of the abode for least significant work at least till the third week of July, 2019 & if moving, then do remember all the precautionary measures instructed above for lightning, rainfall & storm.
