**Atmosphere of tomorrow:** Partly cloudy sky with chances of rainfall in the evening

### Peculiar observation:

- Erratic rainfall is expected to occur in Gorakhpur in the first week of August, 2019.
- Gorakhpur has been recorded with the highest rainfall of 696.8 mm for the July month, when compared with the last 7 years data for the entire month of July.
- Yesterday's (July 31, 2019) maximum & minimum temperature recorded by Climate Cell of Gorakhpur is 34.7°C & 26.5°C respectively with maximum & minimum relative humidity as 73 % & 65 % respectively along with the speed of maximum wind gust as 17.7 km/h with the dominated wind direction as ENE.
- Wind speed will be fairly high in the first week of August 2019.

### Precautionary measures for citizens of Gorakhpur for next 1 week:

- Lightning seeks the highest ground, so if indoor shelter is not available, crouching down in the nearest, lowest & unexposed point is a better bet majorly during cloudy & rainy hours till the storm gets completed.
- Tents & pavilions found inside/near parks are not good option to stay during thundershower.
- Try to stay indoors with closed windows & minimal usage of electric appliances during the rainy & stormy hours and if outdoor then choose an open ground at lower elevation-that too away from water body & tall or metallic structures.
- Stay in a safe place and away from the haggard trees or heavy & loose objects lying in an open atmosphere during thundershower.
- Plan for the outdoor work execution when there is no or minimal presence of cloud in the sky & do take necessary things to stay safe from the stormy winds, heat waves & rainfall. Avoid moving out of the abode for least significant work at least till the first week of August, 2019 & if moving, then do remember all the precautionary measures instructed above for lightning, rainfall & storm.
