Tehsil- Sadar(Gorakhpur) -By AWS	5	60	32	25	NA	NA	NA	NA
District- Gorakhpur	5	60	32	25	92	85	27	ENE

Atmosphere of tomorrow: Partly cloudy sky with hazy sunshine in the afternoon & chances of light rainfall

Peculiar observations of Climate Cell:

- Yesterday's (September 21, 2019) maximum & minimum temperature recorded in SADAR was 32.8°C & 25.8°C. Also, the speed of maximum wind gust recorded by Climate Cell for yesterday was 27.4 km/h with the dominated wind direction as 'NNE'.
- Moderate to rather heavy rainfall with thundery development & high wind hust is likely to occur in an erratic manner in Gorakhpur from September 27, 2019 till October 3, 2019- majorly on September 29 & September 30, 2019.

Precautionary measures for citizens of Gorakhpur for next 1 week:

- Lightning seeks the highest ground, so if indoor shelter is not available, crouching down in the nearest, lowest & unexposed point is a better bet majorly during cloudy & rainy hours till the storm gets completed.
- Tents & pavilions found inside/near parks are not good option to stay during thundershower.
- Try to stay indoors with closed windows & minimal usage of electric appliances during the rainy & stormy hours and if outdoor then choose an open ground at lower elevation-that too away from water body & tall or metallic structures.
- Stay in a safe place and away from the haggard trees or heavy & loose objects lying in an open atmosphere during thundershower.
- Plan for the outdoor work execution when there is no or minimal presence of cloud in the sky & do take necessary things to stay safe from the stormy winds, heat waves & rainfall. Avoid moving out of the abode for least significant work at least till the completion of first week of October, 2019 & if moving, then do remember all the precautionary measures as mentioned above.
