	Annexure-A	123-124
	Annexure-B	125-127

PREFACE

The National Disaster Management Act, 2005 mandates authorities at different levels to develop a comprehensive District Flood Management Plan (DFMP) at each level. The guiding principles of NDMA has immensely helped us to develop a plan at District level through the preparatory mode initially strengthening the communities, elected bodies (Urban & Rural) and administrations' response and preparedness. Undoubtedly the NDMA envisages an ideal District Flood Management Plan that ensures local ownerships, addresses local needs, and promotes volunteerism and mutual help to prevent and minimize loss or damages from natural calamities, viz.- flood, cyclone, landslide etc.

The DFMP, Sepahijala has highlighted a set of guidelines for some particular Government Departments, which are the first responders & during, pre and post disaster situations.

In addition to this, the other Government Departments / Urban Local Bodies / Private Agencies / NGOs will be guided by the District Disaster Management Authority (DDMA), Sepahijala to perform their functions as per the demand of the situation.

I hope that the implementation of the District Flood Management Plan will induce for promptness among stakeholders for combating natural calamity situation to mitigate damages and loss of life in a systematic manner.

I also hope this plan will be widely used by all the stakeholders in the Sepahijala District, inspiring us to make participatory multi-stakeholder's plan.

(Vishwasree B., IAS)
District Magistrate & Collector
Sepahijala District, Bishramganj

FOREWARD

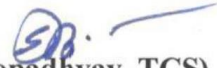

I am pleased to present the District Disaster Management Plan (DFMP) of Sepahijala Tripura. It is well known to all that the Plan has become an Act now in the country and the Government of Tripura has decided to make serious efforts to mitigate and manage the disaster under any circumstances. The Disaster Management Act, 2005 stipulates to put in place of the plans aimed at reducing potential loss of life and property in natural calamities as well as ensuring strong preparedness, response and recovery measures to manage natural calamities.

Natural disasters viz. volcanic, earthquake, cyclone, landslide, cloud burst, flash floods etc.-affect life and environment. Past experiences in Sepahijala District shows that each disaster situation throws up a new set of challenges which the government agencies have to deal with.

This Plan has been prepared as per the guidelines provided by the National Disaster Management Authority (NDMA) and State Disaster Management Authority (SDMA) mandates the rules and functions to be played by the District Disaster Management Authority.

This plan shall be reviewed periodically by the DDMA, Sepahijala to update all activities and information. Regular trainings and mock drills are carried out to enhance capacities of all departments for effective management of disasters.

I hope that the plan will serve the purpose to a great extend for the beneficial of the general public as well as DDMA to reduce the disaster risk.

(S. Bandopadhyay, TCS)
Addl. District Magistrate & Collector
Sepahijala District, Bishramganj
