Network and Internet setting वर click करा

### 3. वाय - फाय वर click करा

## 4. Manage known networks हे पर्याय निवडा.

### Manage known networks निवडा.

The screenshot displays the Windows Settings application. On the left, the 'Network & Internet' category is expanded, and 'Wi-Fi' is selected. The main content area shows the 'Wi-Fi' settings, where the 'Wi-Fi' toggle is turned 'On'. Under the 'Hardware properties' section, the 'Manage known networks' option is highlighted with a yellow box. A blue callout line connects this box to a blue box at the top right containing the text 'Manage known networks निवडा.'.

Manage known networks

Hotspot 2.0 networks

Hotspot 2.0 networks might be available in certain public places, like airports, hotels, and cafes.

Let me use Online Sign-Up to get connected

On

When this is turned on, you can see a list of network providers for Online Sign-Up after you choose a Hotspot 2.0 network.

Connect to a wireless network

If you can't find the network you want to connect to, select Show available networks to open the list of available networks, select the one you want, select Connect, and then follow the instructions.
