1. Introduction

1.1 Mukhyamantri Gramin Pejal Nishchay Yojana

Mukhyamantri Gramin Peyjal Nischay Yojana is being implemented in 4291 Gram Panchayats by Panchayati Raj Department, Bihar. Its aim is to provide clean drinking water through piped water supply to every household in rural area.

The scheme has different components such as Boring, PVC water storage tank with staging, Submersible Motor Pump, Rising main and Distribution pipe lines including house connections.

2. Project Objective and Scope of Work

There are about 58612 wards being covered in 29 districts. Each ward have an average 167 households. Panchayati Raj Department, aim to build and maintain technology based infrastructure that helps to monitor piped water supply at each ward level including operation and maintenance for 5 years. Following are the requirement for ward level piped water supply monitoring system:

- a. Quantity of Water extracted from borewell per day.
- b. Consistent functionality of each scheme.
- c. "Dashboard- To monitor status of above parameters for each ward and prepare ward wise reports of the above facts and figure at district level as well as state level as per requirement, The agency will setup command control center at district headquarter for necessary co-ordination. Monitoring and reporting:"

2.1 Purpose of RFP

The purpose of this RFP is to select and enter into a contract with a qualified firm for the Supply, Installation, Operations and Maintenance of IOT based ward level Piped Water Supply Scheme within district.

This RFP is designed to provide interested bidders with sufficient basic information to submit proposals meeting minimum requirements but is not intended to limit a proposal's content or exclude any relevant or essential date.

3. Solution Description

The overall solution is described in three parts:

3.1 Hardware

The qualifying firm shall provide IOT based solution for Piped Water Supply monitoring at ward level by providing necessary hardware- Sensors for Quantity and Quality as per IS specification of water extracted and control Unit. All the necessary arrangements must be made to send data to their server/ centralized server in specific format. All these have to be managed by qualifying firm. There should be provision to store the data in internal memory in case of network non-availability and whenever network is available it should send/upload the saved data to their server such that no data is missed/lost.

3.2 Software

The qualifying firm shall develop remote monitoring dashboard provide access to State, District, Block and Panchayat level officers. The software solution should also generate necessary report on daily/weekly/monthly and yearly basis and automate the reports availability to concerned officer's email id. The web based software solution should generate alert notifications to concerned support staff through SMS and e-mail.

3.3 Support

The qualifying firm shall have necessary support servicing staff at district head quarter to maintain the IOT system functional. The qualifying firm should meet 48 hours of service level agreements (SLA) and within that timeframe either repair or replace the faulty part and make the IOT system functional.

4. Eligibility Criteria

Proposal not complying with minimum eligibility criteria, as enumerated below, will be rejected and will not be considered for evaluation of technical bid. The proposal should adhere to the following minimum eligibility criteria:-

1. The bidder must have proper ISO certificate.
