

## The Education Mission

The Education Mission, an ambitious project of the State Government, proposes comprehensive educational reforms including upgrading 1000 Government schools into international standards during the first phase. The idea is not only to improve the infrastructural facilities, but also to reform the teaching and learning process to the present day needs by introducing ICT enabled learning and providing smart classrooms. There will be focus on creating educational programmes which are useful for differently abled students. It is also meant to reinforce the teaching –learning process by providing ample opportunities to each student to construct their own knowledge using modern technology tools.

### Education Mission – Achievements of the district

A total of 3709 classrooms in various schools have been converted to high-tech classrooms in the district. Biodiversity parks too were set up in 122 schools in the district, in an attempt to augment environmental studies. Work related to setting up of five more biodiversity parks is on. As a result of various campaigns undertaken by the government to promote public education, the district saw a steep increase in student enrolment in government schools. Compared to last year's data, it showed an increase of 1,613 in enrolment.
