A number of rivers and seasonal rivulets which flow through this District basically drain out almost all the rain waters from the hills to the Great Planes. Main rivers like Ghaggar, Tangri, Kaushalya and Omla flow through this district. In this district there is no major problem of flood. However, there is a problem of soil erosion. Being sub mountainous area the rivers wash away land. The component of nature is beyond our control. However, the human component to fight the flood disaster, if it takes place, is within our control. Efforts shall be made to pool the resources at our disposal from all corners and to make use of our managerial power. The cumulative wisdom and experience of Revenue, Drainage (Water Services Division) Food and Supplies Agriculture, Animal Husbandry, Health, P.W.D., Public Health, Forests etc. has been pooled up to bring out the Brochures named as Flood Control Order.

### 1.3 Land use pattern of the district.

### **Flood Preparedness roll of Public Health Engineering division**

The P.H.E.D. Department looks after the flood problems in urban area. In Panchkula District, Pinjore & Kalka towns come under the jurisdiction of Public Health. There is no necessity of electric driven pump set and diesel engine pumps as both the towns are situated at such a hilly terrain that the rain water flushes out very quickly through open drains, nallahs which are maintained by Municipal Corporation. There is no problem of accumulation of flood water. Even in the past no such problem was faced. Before and after rainy season sewerage system will be checked and cleaned, when ever any mixing/leakage of sewerage system noticed, the same will be rectified immediately. Sufficient bleaching powder is also kept ready for chlorination.

## **Flood Preparedness in O/o District Ayurvedic Officer, AYUSH Panchkula**

**All ayush medical officers posted in AYUSH departments in district Panchkula have been directed to provide first aid and other treatments during flood and in other epidemic conditions and the department will fully cooperate with district Health department, Panchkula in flood and other epidemic conitions.**

### **Department of Agriculture: Flood Preparedness-2018 District Panchkula**

Panchkula district came in existence on 15<sup>th</sup> August, 1995 after bifurcating from Ambala district. About 21000 hect was net sown area at that time and now with rapid urbanization and industrial growth, the net cultivated area has reduced. The Maize, Rice are the main cereals crops of the Kharif season however, the cultivation of sugarcane, Kharif pulses are also being cultivated in some area apart from the cultivation of fruits & vegetables in some areas. A target of 19000 ha. For cereals (Maize, Rice & Kharif pulses) and 1000 ha. for sugarcane crop has been fixed for the ongoing Kharif season.

The Paddy and Sugarcane crop can tolerate flood like situation to great extent. Maize crop is generally grown in Pinjore and Morni block of district, which are consisting of hilly sloppy land and flood does not causes much damage to this crop because rain water is drained out simultaneously. In case the rains falls for prolong period, then the loss to the vegetables and other crops can take place to some extent. During the rainy season the advisory messages will be flashed out amongst the farming community to protect the crops from the havoc of floods. Two agriculture development officers named Sh. Pankaj kumar, Rattewali and Sh. Sandeep Raheja, Pinjore have acquired the training on flood control system at Kurukshetra. Beside this constant vigil will be kept by available manpower of the department on flood situation regularly during the season round the clock.

One jeep is available with this office for keeping the movement of required officials/ officers from one destination to other, in case any adverse situation is witnessed due to flood.

**General:**

Prompt dynamic and realistic approach is required in emergency created by floods. Officials concerned with these efforts must realize the importance of the task that has been entrusted to them from time to time and they should react on the basis of requirement of the situation immediately rather than waiting for the order of the superiors.

For this, it is team work and can succeed only if whole of the team clicks as one.

**Review and Evaluation:-**

The Deputy Commissioner will review the flood situation daily in the evening with Officers of Police, Medical, Animal Husbandry, Drainage PWD (B&R) Development & Panchayat Department and will give directions for next day task and future programme.

## **Chapter- 5** **Flood Action Plan**

### **5.1 Setup of flood control room**

#### **Administrative set-up**

Panchkula District has four Development Blocks. There will be six base control rooms at 'A' level (Block level). They will disseminate the information to 'B' level Control Rooms, which are at Tehsil offices. The 'C' level Control Rooms will be Sub Master Control Rooms for each Sub Division which have the power to decide on the spot about the course of action to be taken and then in all cases to inform the master control room at 'D' level which is situated at Deputy Commissioner's office, Panchkula (Tehsil Building). Besides the Revenue Development Branch Control Room, the drainage department will have its communication network at Key points. For Tangri River, the point will be Barwala Bataur Bridge. Walkie-Talkie sets are to be provided by the drainage department where necessity arises.

Wireless network of Forest Department will also be used for passing information regarding rainfall in the Morni Hills. Divisional Forest Officer, Morni at Pinjore will depute the forest officials of Morni Block who are having wireless sets for giving information in respect of their areas regarding (a) the time of starting of rain if it continues for more than 30 minutes (b) its intensity and (c) land sliding causing harm to the public.

The above mentioned information shall be passed on by Morni Control Room of Forest Department to the Control Room of 'A', 'B', 'C' and 'D' levels immediately.

The Executive Engineer Water Services Division, Panchkula will make use of the Irrigation Telegraph Network on the receipt of high flood warning when the discharge exceeds 30,000 cusecs. The 'D' level Control Room will be informed which in turn will arrange for Public help for the effected areas. The onus of taking preventive measures will be on 'B' level Control Room Sub Divisional Officer (Civil), where the respective Sub Divisional Officer (Civil) will take all necessary action to meet the threat. The Block Development & Panchayat Officer will ensure wide publicity of high floods in affected areas. Block Development & Panchayat Officer will also make arrangements to stag sand bags in sufficient numbers in advance so that the same could be used at the time of necessity.
